

Test Scenarios

Any. do Mobile App

Overview

These test scenarios for the Android version

Core Functionality (High - 1)

1. **Create Task:** Create tasks with various details - title, due date, notes, subtasks, and attachments (images, files). (Expected: Task saves with all details)
2. **Edit Task:** Edit existing tasks - change title, due date, notes, subtasks, and attachments. (Expected: Changes reflected accurately)
3. **Mark Complete:** Mark tasks as complete and move them to a dedicated section. (Expected: Tasks are visually distinguished and easily accessible in the completed section)
4. **Set Reminders:** Set one-time and recurring reminders with specific dates and times. (Expected: User receives notifications at designated times)

User Management (Medium - 2):

5. **Sign Up & Login:** User registration and login with different methods (email/password, social login). (Expected: Smooth registration and login process)
6. **Account Management:** Edit profile information, change passwords, and manage notification preferences. (Expected: User can modify account details easily)

Advanced Features (Medium - 2):

7. **Lists & Boards:** Create, manage, and organize tasks within lists and projects. (Expected: User can categorize and group tasks effectively)
8. **Sharing & Collaboration:** Share tasks and lists with other users, assign tasks, and collaborate in real-time. (Expected: Seamless sharing and collaboration experience)
9. **Search & Filtering:** Search tasks by title, due date, or keywords. Filter tasks by status (completed, upcoming) or list/project. (Expected: Efficient search and filtering for quick task retrieval)

Mobile Testing Focus (High - 1):

10. **Performance:** Test app responsiveness with a large number of tasks, lists, and attachments. (Expected: No lags, crashes, or significant performance issues)
11. **Device Compatibility:** Test across various Android devices with different screen sizes and OS versions. (Expected: App functions and displays correctly on all compatible devices)
12. **Offline Functionality:** Create, edit, and manage tasks while offline. (Expected: App functions offline and synchronizes changes seamlessly when online)

Additional Testing (Medium - 2):

13. **Localization:** Test app functionality and UI in different languages (if supported).
(Expected: Accurate translations and consistent user experience across languages)
14. **Negative Testing:** Try to create tasks with invalid data (empty title, past due date) and perform unexpected actions. (Expected: App prevents errors and displays informative messages)
15. **Offline Functionality:** Create, edit, and manage tasks while offline. (Expected: App functions offline and synchronizes changes seamlessly when online)
